

TELL US YOUR STORIES: We are seeking to conduct brief video interviews via computer in advance of the conference. These case studies will introduce portions of the program, stimulate further discussion and help us manage time constraints. Please consider what you can share that will help others in your situation. Suggested topics of interest:

- What challenges has your agency or company faced since the pandemic struck, and how were they overcome? How will your operations change going forward?
- Has technology been the solution to any of the issues disrupting your operations during the shutdown? How is that going?
- Did re-writing rules or regulations allow licensure to proceed in the midst of the crisis?
- Has virtual training allowed your program to continue? How has that been received?
- How have your relationships with Government and/or Industry representatives (possibly developed through IASIR) helped you to resolve problems during the pandemic?
- Who is getting it right? Industry members: what changes have you seen that are really working? Government members: highlight ways Industry has helped with solutions.

SCHEDULE AN INTERVIEW: Email contact@iasir.org to set up an interview to share your story with other virtual conference attendees.
